DISCHARGE SUMMARY

PATIENT INFORMATION

Patient Name: Lance Leannon
Date of Birth: 11/04/1947
Admission Date: 04/11/2026
Attending Physician: Dr. Germaine Johnston
MRN: MRN-78708123
Insurance ID: INS-6659194202
Discharge Date: 04/25/2026

VITALS AT DISCHARGE

BP: 145/74 mmHg
Temp: 98.8 F
Resp Rate: 12 breaths/min
HR: 55 bpm
SpO2: 94%
Weight: 125 lbs

DIAGNOSES

1. Type 2 Diabetes Mellitus (E11.9)
2. Atrial Fibrillation (I48.91)
3. Chronic Obstructive Pulmonary Disease (J44.1)
4. Osteoarthritis, unspecified (M19.90)
5. Essential Hypertension (I10)

HOSPITAL COURSE

Patient was admitted via the emergency department following hypertensive urgency with headache and visual changes. IV access was established and aggressive fluid resuscitation was initiated. Echocardiogram demonstrated preserved ejection fraction with mild diastolic dysfunction. The patient's electrolytes were repleted as needed with close monitoring of serum levels. Strict fluid balance was maintained with daily weight checks and accurate intake/output recording. Serial troponins were drawn and trended over the first 12 hours of admission.

DISCHARGE MEDICATIONS

1. Amlodipine 5mg - once daily
2. Lisinopril 10mg - once daily
3. Hydrochlorothiazide 25mg - once daily
4. Gabapentin 300mg - three times daily
5. Levothyroxine 75mcg - once daily on empty stomach

FOLLOW-UP INSTRUCTIONS

Follow up with Dr. Germaine Johnston on 05/22/2026. All follow-up laboratory work has been pre-ordered and scheduled at the outpatient facility. All new and changed medications have been reviewed in detail with the patient and caregiver. Emergency contact information and after-hours nurse line number provided to patient and family. Home blood pressure monitoring is recommended with log to be brought to follow-up appointment.

Electronically signed by Dr. Germaine Johnston
